How many questions are asked in GATE Production & Industrial Engineering 2022? Á Áns. The topic which has the highest weightage in the GATE Syllabus for Production & Industrial Engineering (PI) 2022 is Production Engineering, as questions worth 30 to 40 marks are asked on average. How much time is required for the GATE Syllabus for Production & Industrial Engineering 2022? GATE Production & Industrial Engineering Question paper will have a total of 65 questions, out of which approximately 45 questions will be PI Core Subject Questions. Facility Design: Facility location factors and evaluation of alternate locations; Types of plant layout and their evaluation; Computer aided layout design techniques; Assembly line balancing; Materials handling systems. Which are the most important subjects in the GATE Syllabus for Production & Industrial Engineering (PI) 2022? Á Áns. For more tips, check GATE Preparation Guidelines Ques. 404 to 405 Ques.Á Áns. Production control: Forecasting techniques eÁÁÁ causal and time series models, moving average, exponential smoothing, trend and seasonality; Aggregate production planning; Master production scheduling; MRP, MRP-II and ERP; Routing, scheduling and priority dispatching. Push and pull production systems, concepts of Lean and JIT manufacturing systems; Logistics, distribution, and supply chain management; Inventory eÁÁÁ functions, costs, classifications, deterministic inventory models, quantity discount; Perpetual and periodic inventory control systems. Project management: Scheduling techniques eÁÁÁ Gantt chart, CPM, PERT and GERT. The best GATE Books for Production & Industrial Engineering 2022 are as follows:Á Á GATE 2020 eÁÁÁ Guide eÁÁÁ Production and Industrial Engineering by GKP GATE 2020 eÁÁÁ Solved Papers eÁÁÁ Production and Industrial Engineering by GKP CMOS Gate-Stack Scaling - Materials, Interfaces and Implications: Volume 1155 (English, Paperback, unknown) by Cambridge University Press Ques. Joining of Materials: Classification of joining processes; Principles of fusion welding processes using different heat sources (flame, arc, resistance, laser, electron beam), Heat transfer and associated losses; Arc welding processes - SMAW, GMAW, GTAW, plasma arc, submerged arc welding processes; Principles of solid state welding processes - friction welding, friction stir welding, ultrasonic welding; Welding defects - causes and inspection; Principles of adhesive joining, brazing and soldering processes. Machining: Orthogonal and oblique machining, Single point cutting tool and tool signature, Chip formation, cutting forces, Merchant's analysis, Specific cutting energy and power; Machining parameters and material removal rate; tool materials, Tool wear and tool life; Thermal aspects of machining, cutting fluids, machinability; Economics of machining; Machining processes - turning, taper turning, thread cutting, drilling, boring, milling, gear cutting, thread production; Finishing processes eÁÁÁ grinding, honing, lapping and superfinishing. Have a thorough understanding of the previous years paper analysis for Production and Industrial Engineering Paper. Work System Design: TayloraÁÁAs scientific management, GilbrethseÁÁAs contributions; Productivity eÁÁÁ concepts and measurements; Method study, Micro-motion study, Principles of motion economy; Work measurement eÁÁÁ time study, Work sampling, Standard data, PMTS; Ergonomics; Job evaluation and merit rating, Applied Mechanics: Engineering mechanics eÁÁÁ equivalent force systems, free body concepts, equations of equilibrium; Trusses; Strength of materials eÁÁÁ stress, strain and their relationship; Failure theories; MohreÁÁAs circle (stress); Deflection of beams, bending and shear stresses; EulersÁÁAs theory of columns; Thick and thin cylinders; Torsion. Product Design and Principles of product design, tolerance design; Quality and cost considerations; Product life cycle; Standardization, simplification, diversification; Value engineering and analysis; Concurrent engineering; Design for eÁÁÁeÁÁÁ. Engineering Economy and Costing: Elementary cost accounting and methods of depreciation; Break-even analysis; Techniques for evaluation of capital investments; Financial statements; Activity based costing. Polymers and Composites: Polymer processing eÁÁÁ injection, compression and blow molding, extrusion, calendaring and thermoforming; Molding of composites. GATE Syllabus for Production & Industrial Engineering (PI) 2022 will have questions in 3 different sections, Engineering Mathematics, General Aptitude and Core PI subjects.Á Á Ques. How to prepare for completing GATE Syllabus for Production & Industrial Engineering 2022? Á Áns. Candidates choosing PI as their first paper can either sit for XE as their second paper *The article might have information for the previous academic years, which will be updated soon subject to the notification issued by the University/College. Machine Tools: Lathe, milling, drilling and shaping machines eÁÁÁ construction and kinematics; Jigs and fixtures eÁÁÁ principles, applications, and design. What is the paper code for GATE Production & Industrial Engineering 2022? Engineering Materials: Structure, physical and mechanical properties, and applications of common engineering materials (metals and alloys, semiconductors, ceramics, polymers, and composites eÁÁÁ metal, polymer and ceramic based); Iron-carbon equilibrium phase diagram; Heat treatment of metals and alloys and its influence on mechanical properties; Stress-strain behavior of metals and alloys.
