A new and improved gearbox with a lower gear ratio increases the low end torque, in addition to the built-in power trim and inclination makes theseA dream to deal with a variety of crafts. For more information, visit www.yamahaoutboards.com. It offers more stroke, 3 km / h strokes than the most close and more rapid mph than the 115 Mercury 115 MPC. All four models are based on a 66-degree V-6 block that shifts 167 inch cunia/2.7 liters. These innovative four -stroke, four -cylinder and four -stroke poosters have Suzuki's accelerator and precise control shift, as well as the innovative Suzuki selective rotation gearbox. The BRP is the external manufacturer that offers a 5-5, with 5-year-old engine warranty, anti-corrosion warranty in 5 years and 5 years/500 hours without the dealer scheduled maintenance. allowing the largest number of problems -free time on water. The G2 (Generation 2) wave of G2 (generation 2) includes the following new models: 150, 150 Ho, 175 and 200 horsepower. Like the largest of 210 inches/3.4 liter G2 V-6 of two strokes that some seasons have been introduced, this last class of reduced G2s offers some truly based resources that definitely attract coastal fishermen. The largest RPM range of the 115 Pro XS Fourstrake (5300-6300) offers improved performance from a powerful engine. An electronically controlled acceleration and electronically controlled fuel electrical injections make these people who divert 17 % more efficient in terms of combustible. Although the BF100 uses the same block as its small sister, BF75 and BF90, it is designed to speed up and produces its full potential using premium 93 octane gasoline. Yamaha Yamaha recently introduced new mechanical control versions of its external v6 function of 4.2 liter proven F225 and F250, disposable, disposable as F250xb na left and right and the F225xb only on the right rotation. When introduced in 2007, the Yamaha F350 redefined offshore energy. This technology increases displacement without enlarging the outer diameter of the cylinder bores, resulting in an outboard with the largest displacement in its class. All new Honda outboard engines sold for recreational use, including the new BF100, offer an industry-best True 5-year, non-declining limited factory warranty that is the same on the last day as it is on the first. A camshaft-driven trochoid oil pump ensures long-term durability of critical engine components and the stainless steel water pump housing liner enhances long-term durability. The adjustable steering friction and trim tab reduces the amount of steering effort, making for an easier and more enjoyable boating experience. Whether you choose digital electronic control or the new mechanical control F250/F225, you get the same features, power and performance inside. Low oil pressure and overheat warning (visual and audible) help keep the operator apprised of the current engine status, along with a battery voltage warning (visual only). Superior battery charging is achieved with the Honda exclusive neodymium magnet flywheel, producing 44 total amps and 35 battery charging amps. The Honda BF100 incorporates numerous innovative, advanced design elements. Tohatsu Two of the newest Tohatsu outboards are the MFS 40 and MFS 50 four-strokes. Honda Honda¢ÄÄs latest four-strokes include new mini outboards of 4, 5 and 6 horsepower, in addition to a nifty BF100 that is an excellent power solution for a wide range of flats, skiffs and bay boats in the 17- to 20-foot range. Suzuki¢ÄÄs exclusive Selective Rotation uses a specially-designed gear case capable of either standard or counter rotation. These EFI four-strokes are some of the lightest outboards in their class, tipping the scales at a relatively svelte 209 pounds. It is light and according to none in performance. These generations are equipped with proven technology, including fuel electrical injections (EFI) and digital cd ignition, which provides rapid throttle response and excellent combustible savings. A variable immersion velocity control ranging from 650 to 950 rpm will allow fishermen to adjust their precise velocities of fish capture drag in a variety of water conditions and sea. Thousands of F350 Outboards later, Yamaha updated this performer proven with F350C launch, a Premier Offshore Outboard that offers all the benefits of the original with additional refinements and five years of limited warranty coverage. Engine performance is enhanced by a 10.2: 1 compressing reason that generates ideal potential, contributing to an impressive racing of hole and dio range. The disposable Thrust gear gear option makes this engine compatible with Mercury's highest dial -up hoods that help the engine offer better performance and raise heavy boats on the most fancil and the most fancil. Helm Master does not make the anchorage more fancil, it also incorporates the guardian of auto stern, speed control and motor control of direction friction. The new Parana © is G2 from 150 to 200 horses incorporate integrated hydraulic direction, the right -hand direction, a unit of inclination/trim of internal power of generation o, a 3-hearty leap reservoir (with optional remote tanks of 10 hearththrobes, 3 hearththrobes and 1.8 liters) and can run all day with 87 octane e10 gasoline. Variiable Variivula (VVT) and multi-Stage induction work together to provide the mother, torque, acceleration and combustible economy in a wide range of RPM. These new E-Tec G2 engines offer the first and visual visual and custom visual, the clean screening and fully integrated digital. Both the MFS 40 and the four-stroke MFS 50 feature boot protection for a safer engine, along with an integrated over-rev limiter. integrated. fact, the new 115 Pro XS is 16 pounds lighter than the two-stoke direct injected 115 OptiMax that it replaces, plus it¢ÄÄs 18-pounds lighter than the nearest 115-horsepower engine from this year¢ÄÄs competitive crop. With the economy showing some signs of life and the price of gasoline still relatively affordable, it¢ÄÄs time to consider getting that new boat and motor, or possibly repowering an old favorite. With a full-throttle rpm range of 5500 to 6300, the Honda BF100 is a high-performance, 4-cylinder, 1.5-liter (91.4-CID) four-stroke outboard engine weighing in at a lean 366 pounds. VTEC technology offers a broad, flat torque curve and smooth power delivery throughout the engine¢ÄÄs entire operating range, allowing the operator to enjoy outstanding performance and impressive fuel efficiency. These V6 Offshore mechanical outboards are more than 50 pounds lighter than the venerable Yamaha 3.3-liter V6s. V6s.
